Instructions to Authors

The Journal of Reproduction Engineering (JRE), the official journal of the Society for the Study of Reproduction Engineering (SSRE), is published as the journal specialized in original articles (Full paper, Notes or Novel technique) that report new findings or concepts in reproduction engineering of animals and humans. Topical coverage includes but not limited to : manipulation of germ cells and embryos (*in vitro* development, cryopreservation, micromanipulation), assisted reproduction in clinical and veterinary medicine, and genetic modification of animals by gene transfer.

All manuscripts are reviewed critically by two or more reviewers. Acceptance is based on scientific content and presentation of materials. The editors select reviewers, overspend with authors, and make final decisions about manuscript.

Critical reviews or mini-reviews will be published from time to time. These will normally be by invitation, but the editor will also consider submitted articles.

SUBMISSION OF MANUSCRIPTS

Manuscripts should be sent to the editor , Norihiro Tada, Atopy Research Center, Juntendo University School of Medicine, 2-1-1 Hongo, Bunkyo-ku, Tokyo, Zip 113-8421
